2016-10-13

introduces the continent of antarctica and some of its unique characteristics

## ***The Mapping of Australia and Antarctica***

2009

1956 the height of the cold war fourteen scientists will spend fifteen months on an isolated rock outcrop at the edge of the antarctic plateau mawson station is australia s first continental station and will become the longest continuously operating settlement inside the antarctic circle the surveyor is sydney lorrimar kirkby he will go on to clock up extraordinary achievements but already he has achieved the impossible he had polio as a child so how could he hope to pass the commonwealth medical test it took a bit of cunning but he got through the age requirement for any member of an australian antarctic team was twenty six years old syd is twenty one he s not a fully qualified surveyor but he will be when the ship leaves for mawson with him on board over the next twenty years syd kirkby will explore and map more unknown regions in the world than any other person in history fixing antarctica is the first full biography of this important twentieth century explorer told through interviews with his contemporaries personal diaries and the diaries of other antarctic explorers this account establishes kirkby in his rightful place as one of the great polar explorers cover illustration the cover of fixing antarctica is drawn from a portrait by tom macbeth a finalist in the archibald prize and its associated salon des refuses

## ***Selected Maps and Charts of Antarctica***

1959

a financial times book of the year 2020 shortlisted for the estwa award for illustrated travel book of the year 2022 one of the least known places on the planet the only continent on earth with no indigenous population antarctica is a world apart from a leading cartographer with the british antarctic survey this new collection of maps and data reveals antarctica as we have never seen it before this is not just a book of traditional maps it measures everything from the thickness of ice beneath our feet to the direction of ice flows it maps volcanic lakes mountain ranges the size of the alps and gorges longer than the grand canyon all hidden beneath the ice it shows us how air bubbles trapped in ice tell us what the earth s atmosphere was like 750 000 years ago proving the effects of greenhouse gases colonies of emperor penguins abound around the coastline and the journeys of individual seals around the continent and down to the sea bed in search of food have been intricately tracked and mapped twenty nine nations have research stations in antarctica and their unique architecture is laid out here along with the challenges of surviving in antarctica sunforgiving environment antarctica is also the frontier of our fight against climate change if its ice melts it will swamp almost every coastal city in the world antarctic atlas illustrates the harsh beauty and magic of this mysterious continent and shows how far from being abstract it has direct relevance to us all

## **Atlas of Antarctica**

2012-12-06

topographic mapping plays a basic and important role within the extensive field of cartography in recent years this type of mapping has become somewhat neglected and available literature is normally restricted to details concerning the programmes of individual countries often presented in the form of monographs topographic maps are essential tools for use in development projects resource exploitation the planning of construction infrastructure and recreation furthermore they give a detailed illustration of the relative degrees of development of areas within a landscape and are thus unique in demonstrating the cultural status of a country this book is the first of three volumes and provides an introduction to world topographic mapping giving details and examples of topographic maps from western europe north america and australasia the information supplied for each country consists of a text including a brief history of the development of topographic mapping geodetic data map scales and series as well as extracts of maps and index sheets illustrating the present status of map coverage within that country there is currently no other work employing the approach adopted in assembling this inventory this work is a comprehensive and important reference and source book for information in the field of topographic mapping

## ***List of Map Series in the Foreign Section: Antarctica, Asia, Australia, and New Zealand***

1973

presents maps of australia the islands of the pacific ocean and the continent of antarctica and provides information about the geography and natural resources of each nation
