the 18th cirp international conference on life cycle engineering lce 2011 continues a long tradition of scientific meetings focusing on the exchange of industrial and academic knowledge and experiences in life cycle assessment product development sustainable manufacturing and end of life management the theme glocalized solutions for sustainability in

manufacturing addresses the need for engineers to develop solutions which have the potential to address global challenges by providing products services and processes taking into account local capabilities and constraints to achieve an economically socially and environmentally sustainable society in a global perspective glocal solutions for sustainability in manufacturing do not only involve products or services that are changed for a local market by simple substitution or the omitting of functions products and services need to be addressed that ensure a high standard of living everywhere resources required for manufacturing and use of such products are limited and not evenly distributed in the world locally available resources local capabilities as well as local constraints have to be drivers for product and process innovations with respect to the entire life cycle the 18th cirp international conference on life cycle engineering lce 2011 serves as a platform for the discussion of the resulting challenges and the collaborative development of new scientific ideas
