Air Force Manual 1972 the application and interpretation of the four geneva conventions of 1949 and their two additional protocols of 1977 have developed significantly in the seventy years since the international committee of the red cross icrc first published its commentaries on these important humanitarian treaties to promote a better understanding of and respect for this body of law the icrc commissioned a comprehensive update of its original commentaries of which this is the third volume the third convention relative to the treatment of prisoners of war and their protections takes into account developments in the law and practice in the past seven decades to provide up to date interpretations of the convention the new commentary has been reviewed by humanitarian law practitioners and academics from around the world this new commentary will be an essential tool for anyone involved with international humanitarian law

Air Force Design Manual 1970 the new handbook on basics of coating technology is a classic reference recently updated with 18 years worth of new technology standards and developments in the worldwide coating industry this is an indispensable reference for anyone in the industry whether you are involved in traditional processes or the most innovative this handbook will be a critical addition to your daily routine full of color images graphs and figures the handbook comes complete with standard tables general classification figures definitions and an extensive keyword index both engineers and technicians will find the answers they need within its pages instead of solving problems after the fact this handbook helps avoiding them in the first place saving time and money this reference also gives beginners and practically oriented readers a journey through the different coating segments clearly illustrated with lots of pictures it also outlines the social changes in the industry concerning environmental compatibility and toxicology which have seriously affected product development
