rojek s argument is a psychological one although his message is political global events build on people s needs to feel empowered and jointly engaged in the pursuit of a higher purpose they allow a break from daily routines provide an illusion of intimacy and social membership and create a sense of self validation and personal gratification in short participation in such events makes us feel good at the same time the real effect of global events seems to be the maintenance of global inequality and social injustice as well as huge profits for the organizations involved in planning commercializing and securing these happenings in sketching out this palliative function of global events from the perspective of people s needs on the one hand and unveiling their puppet masters backstage on the other rojek s book presents a compelling account of the role of organized events in modern society organization studies events dominate our screens our lives and increasingly global geopolitics analysis of events and their management has remained rooted in leisure and management studies until now this breakthrough book provides an introduction to event management while also situating events in questions of power and social control rojek powerfully argues that events are essential elements in corporate state partnerships of invisible government that have revived the romance of charity as to form illusory communities while cloaking power imbalances and social inequalities events are moving politics from the old idea of the personal is political to the new more seductive notion that representation is resistance wielding rich case studies from the world cup and the olympics to live aid burning man and mardi gras rojek presents a dazzlingly original account of communication power social ordering and control it is essential reading in media communication studies and across the social sciences
