identify a small gap in the market using time and money effectively you will need to use different techniques to ensure that your product or service reaches the market in a faster way while also avoiding the production or manufacture of products that no consumer will want most amateur entrepreneurs feel that they are taking a shot in the dark when they are identifying a product or service they can offer to their potential consumers but it does not always have to be a trial and error proposition controlled use and deployment of resources one of the most important principles of a lean startup is that the startup must use everyone of its resources effectively and efficiently since most startups do not have enough investment they use the lean business model to encourage the effective deployment and continuous development of the resources that the company does have a lean startup must continuously evaluate how the initial investment can be used to meet their targets and their customer requirements the startup must also ensure that it does not spend more than what is necessary to test evaluate and refine its products if the costs are kept at a minimum the startup can maximize its profits whenever there is a sale every lean startup is dependent on organic growth since it does not have huge capital investment when the profits made at the early stages are reinvested in the company the startup can scale its operations up in a controlled manner without sacrificing quality entrepreneurs are everywhere eric ries believes that every individual in the world is an entrepreneur there are some successful entrepreneurs who have built their organization in their garage you can find entrepreneurs in hollywood in the irs and even in well established organizations these people are always looking for a way to develop products that increase value to the customer entrepreneurship is management it is important to remember that every startup is not defined by its products but is an institution therefore there must be a management team in place to understand and develop the startup validated learning a startup does not exist only to build products for the customers or to make money it exists only when the management learns how to build a sustainable business the learning can be validated through statistic measures by running experiments that test the startups vision do we have your attention now in this book you will learn what is lean start up lean startup models the 5 principles of lean startup method why do most startup fail what is lean analytics lean analytics to succeed and much more are you excited do you want to know more what are you waiting for download our book now to know everything about lean startup and don t miss the other volumes of the lean series

big rig business startup how to start run grow a successful trucking company after losing my corporate job in 2008 i went through the toughest time of my life at the time my wife pregnant with our third child and my monthly unemployment check wasn't enough to cover our house and two car notes in desperation i decided to go to a local trucking school and get my cdl i found my first driving job a week after i got out of school i still remember my first paycheck was just 55 shy of what i was making at my corporate desk job i was hysteric i was happy i knew this was my new found life and freedom and no one was going to take it away from me long story short after two years of working for other companies i decided to start my own trucking company and i started out as an owner operator in 2013 i decided it was time for me to grow and time for me to get off the road and spend some time with my kids this was when i entered the second phase of my business life i started to buy one tractor every three months as i was hiring great drivers that are professional family oriented and serious about making money by 2016 i had 12 trucks on the road and this is also the year when my net earning passed 350 000 mark to me the 350k mark was always a benchmark why because i knew that was the salary of the ceo of the company i used to work for last year i received a call from a business broker who asked me for a 10 minute meeting he had brought an offer from a big trucking company to buy my company but i didn't even remotely think about selling my company instead i was talking to the bank and was in the process of finalizing a loan for four new tractors with trailers once again long story short after i refused their initial offer they came back with an offer that no reasonable man can refuse and i consider myself a very reasonable man the income potential is truly amazing and yes if you can hire the right people you will not only see significant growth high net income but the satisfaction that you don't get from many other jobs and businesses what i shared in this book are the steps i went through myself i wrote from my own experience and shared a step by step process that is easy and simple to follow and best of all you can get started with very little funding here is a quick view of what i discussed inside this book 5 factors to consider before starting your new trucking business how to get cdl dot and carrier authority number how to obtain a unified carrier registration how to get international registration plan tag fuel tax agreement decal filing a boc 3 form obtaining a carrier alpha code scac business plan for your new trucking company six legal business structures to choose from how to get an ein from irs a business plan that is specific to your trucking business finding buying the right tractors and rigs how to find financing grants loans for your business what and how to get business via the load boards types of freights you

should consider daily administration and operation of your trucking business maintenance of your tractors how to hire and retain great drivers what and how to reap benefits of fuel cards how to market and grow your new trucking business and so much more

How to Start, Run, & Grow a Safety Training Center Business
