A Practical Guide for Self-assessment

1994

in today's competitive sometimes hypercompetitive environments companies need tools that can help them to assess their weaknesses and plan improvements self assessment has emerged as a potentially powerful tool for this purpose until now self assessment has been considered as a by product of quality award assessments as such it is more apt to identify already excellent companies than to spot weaknesses in any kind of company moreover award models and approaches lack diagnostic power this book proposes a model that is no longer a tqm model but a business model and a highly diagnostic process organisational self assessment is unique in its approach to self assessment starting from results and diagnosing the causes within the company it integrates self assessment and subsequent improvement planning into the corporate strategic planning cycle to create a real business model
